

The Modern Enterprise Communication Stack

How IT builds a scalable, AI-ready foundation for the enterprise.

AI & Agentic Capabilities: Force Multipliers Across the Stack

Intelligence applied everywhere—automatically.

- Transcribe & summarize
- Surface insights in real time
- Automate workflows
- Guide agents & employees
- Enable Agentic actions

At an enterprise level:

Contact Center Capabilities, Built on the Same Core

Customer conversations without separate systems.

- Inbound support
- Outbound sales
- Omnichannel engagement
- Real-time reporting

At an enterprise level:

Unified Communications: The Enterprise Foundation

Where every conversation starts.

- Calling
- Messaging
- Meetings
- Presence
- Global voice

At an enterprise level:

Designed for reliability, scale, and admin simplicity

Shared enterprise services that run across all layers

- Security & compliance
- Identity & access management
- Analytics & reporting
- Admin & provisioning
- Integrations & APIs

One Stack. Fewer Systems. Better Outcomes.

When communications share a single foundation, IT reduces complexity—and the business moves faster.

Modernize your stack
